x360Recover
Business Continuity and Disaster Recovery
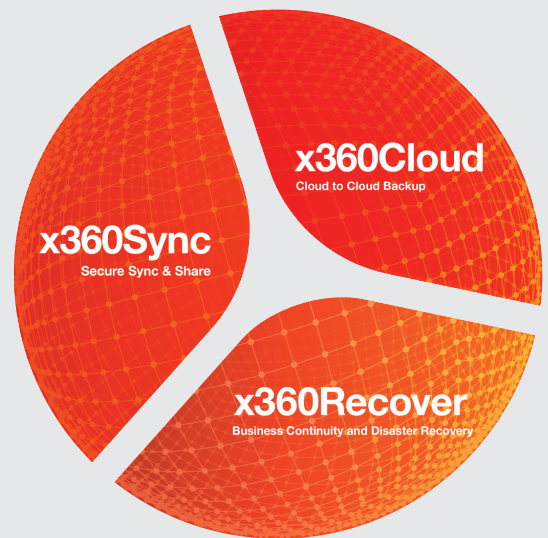

Axcient x360 Platform

The Axcient x360 Platform is the proven business continuity and disaster recovery solution for MSPs. Axcient's powerful business continuity, backup, and disaster recovery solutions protect your clients and enable you to standardize on reliable, affordable technology. Axcient is 100% focused on helping MSP partners build their businesses.

x360 Recover

Axcient x360Recover is the most advanced BDR solution for MSPs which covers more use cases for their SMB clients than any other solution in the channel. This makes it the most cost-effective data protection and business continuity option for any business size or type. Easy to manage, x360Recover boasts chain-free technology, data is checked for corruption before backup, and ticketing and billing processes can be fully automated. Additionally, x360Recover has AirGap to protect backups in case of ransomware.

MSPs can choose our innovative appliance-free solution x360Recover Direct-to-Cloud. It significantly reduced maintenance, limitations, and stress. With Direct-to-Cloud, backup data is sent straight to the secure Axcient Cloud or private cloud, enabling near-instant recovery for anything from a single file to an entire system. Plus, Direct-to-Cloud features optional Local Cache, a recovery acceleration layer for file and bare-metal restores without a pricey on-site appliance.

x360 Cloud

Protect clients' critical Microsoft 365 and Google Workspaces data from a single interface. x360Cloud offers an automated backup of Exchange Online, OneDrive, SharePoint online and Teams data, storing all versions in the SOC 2-compliant Axcient cloud. The search-driven interface makes it easy to find, restore, export, migrate, and analyze backed-up data. x360Cloud is the only backup provider to offer instant full-text search, search in all previous versions, and search across multiple accounts and cloud services. Protect clients' critical Microsoft 365 data from a single interface.

x360 Sync

x360Sync offers partners and their end-users secure cloud file sync and share. End-users benefit from secure access, sharing, and collaboration, while MSPs gain peace of mind knowing that data is protected and secure. x360Sync is the brandable and secure content collaboration tool exclusively built for MSPs that focuses on data protection and maximizing productivity, and reducing the risk of data theft or loss, data sprawl, and lawsuits

Axcient understands that MSPs deliver the best IT. Our goal is to enable our MSP partners and their clients' success with an unparalleled business continuity & disaster recovery platform and best-in-the-channel service.

" x360Recover Direct-to-Cloud is easy to set up, it's easy to deploy, it's easy to recover, it's easy to manage, and overall, it just flat works.

–Phillip Long, CEO at Business Information Solutions

" 'OH MY GOSH, I ACCIDENTALLY DELETED THAT FILE.' CloudFinder x360Cloud is right there. It's easy to bring the file back; it keeps it there forever (especially when that one employee quits or they dump all their files before they go), CloudFinder x360Cloud is there.

–Marc Jamison, President and CEO, 2W Technologies

" The relationship that we have with Axcient has led us to be incredibly successful. Their team is dedicated to channel sales, which allows us to package, position and sell the Axcient product, knowing that we are fully supported.

–Justin Drabouski, Director of Managed Services, Fraser Advanced Information Systems

" By bringing on Axcient, we were actually able to save a lot of our clients a lot of money. We were able to save them 46% as an average across the board for all of our clients that we switched over to x360Recover. And for us, we are making profit margins between 17% and all the way up to 38%.

– Steve Lettery, Director of Business Development at Cinch I.T.
